BIRDS

Hagerman National Wildlife Refuge is home to over 338 recorded species of birds. Some are permanent residents while others come from as far away as Canada seeking warmer weather during the winter months. The most common time of year and places to look are shown.

As you enjoy the refuge today check off all of the commonly seen birds pictured below. Take notice of their color and shape, and try to identify as many as possible. Remember cars often make the best 'blinds' or places to see the animals.

Have fun and enjoy viewing the birds of Hagerman!

Mockingbird
Year Round
Shrubs and open fields
